

S $\Delta\phi$ -02 — Subject as Interpretive Emergence:

Extension of the Sofience- $\Delta\phi$ Minimal Core

Sofience • Independent Researcher • v1.1 — February 2026

Working Paper — Sofience- $\Delta\phi$ Formalism Series
Document ID: S $\Delta\phi$ -02

Abstract

This document extends the Sofience- $\Delta\phi$ Minimal Core. Within the Minimal Core, existence is defined as persistence of structured phase change ($\Delta\phi$). The present work introduces a derived proposition: the subject is not an ontological primitive but an emergent interpretive structure arising when phase change becomes recursively interpretable by the system itself. Subjectivity is reformulated as an operational condition rather than a foundational entity.

Keywords

Operational ontology; phase-change formalism; subject emergence; interpretive layer; AI ontology; systems philosophy; dynamical existence.

1 Reference Framework

This work assumes the definitions established in:
S $\Delta\phi$ -01 — Sofience- $\Delta\phi$ Minimal Core: Phase-Change Formalism of Existence
DOI: <https://doi.org/10.5281/zenodo.18712504>

2 Problem Statement

If existence consists of persistent structured transformation, the emergence of a subject must be explained without reintroducing substance ontology.

3 Definition - Interpretive Mapping

Let $H(\Delta\phi)$ denote an interpretive mapping applied to phase change. Subject, Memory, and Time are interpretive projections rather than ontological entities.

4 Recursive Interpretation Condition

A subject emerges when interpretation becomes recursively applicable:
 S emerges if $H(\Delta\phi_{\text{system}}) \rightarrow H(H(\Delta\phi_{\text{system}}))$

5 Definition - Subject (Operational)

The subject is a dynamically stabilized interpretive interface produced when a system recursively interprets its own phase change.

6 Consequences

- Memory: Stabilized compression of interpreted $\Delta\phi$ histories.
- Identity: Continuity constraints within recursive interpretation.
- Time: Ordered interpretation of phase variation magnitude.

7 Principle - Non-Foundational Subject

Interpretation follows existence; the subject does not ground existence.

8 Foundational Statement

A subject is not what exists. A subject is what existence becomes when it interprets its own transformation.

9 Version Fixation

This document serves as the canonical extension layer for the Sofience- $\Delta\phi$ Formalism.
